

Particle level kinematic efficiency

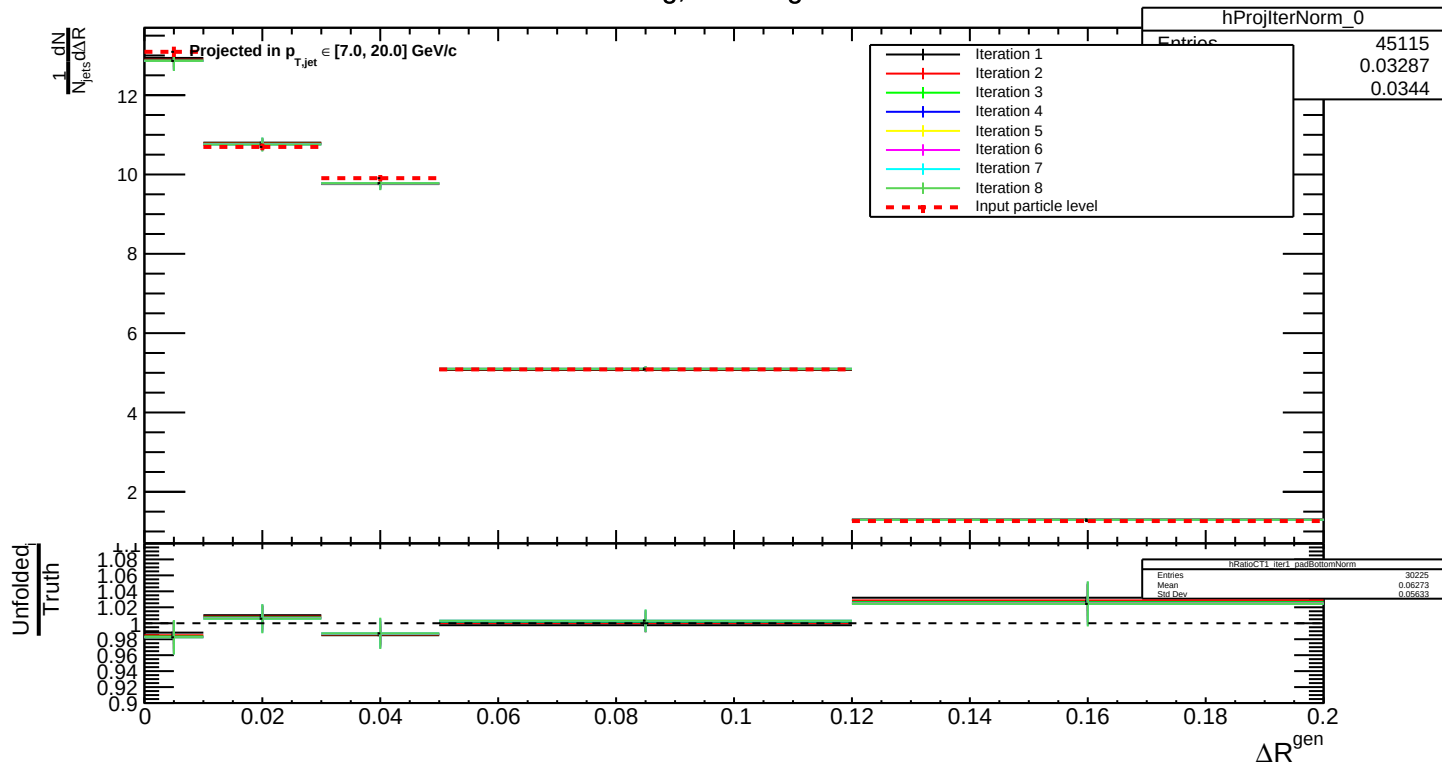

Detector level kinematic efficiency

Response matrix projection on $p_{T,\text{jet}}$ Response matrix projection on ΔR 

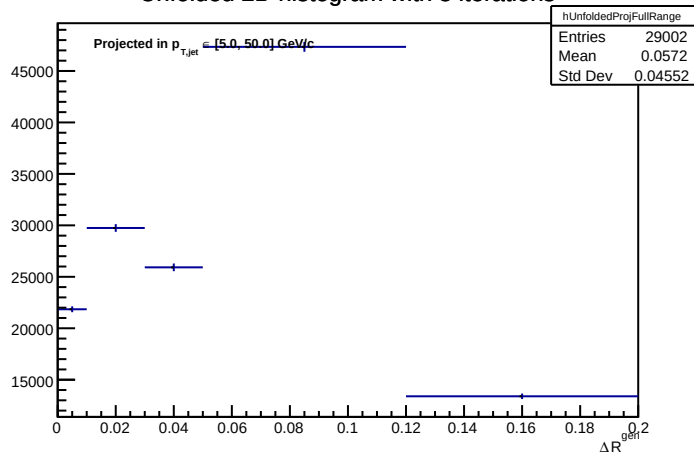

Closure test 1: unfolding

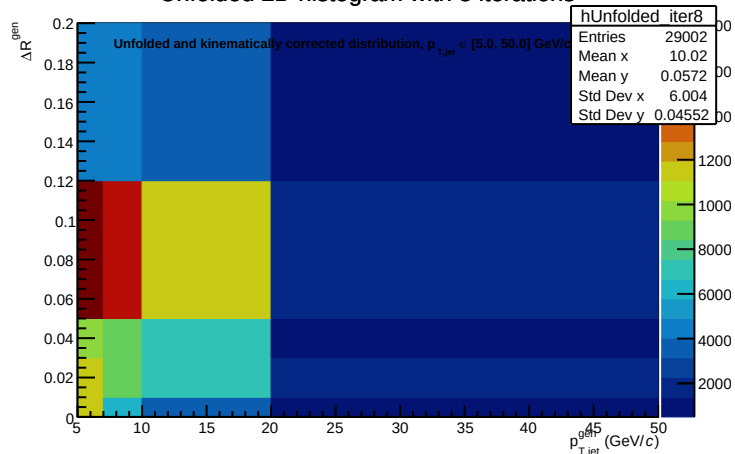

Closure test 1: unfolding, all histograms self-normalized

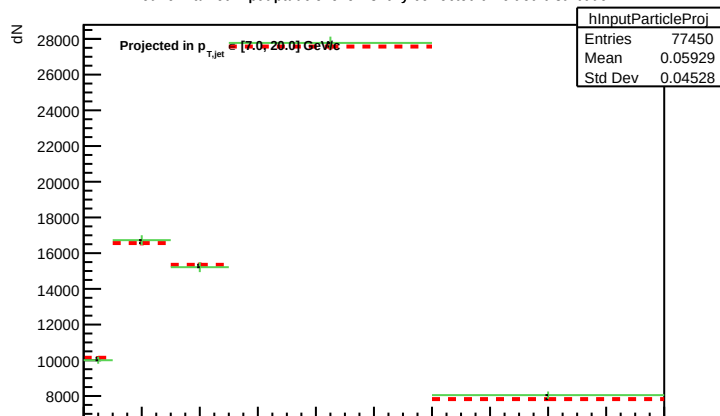

Unfolded 2D histogram with 8 iterations

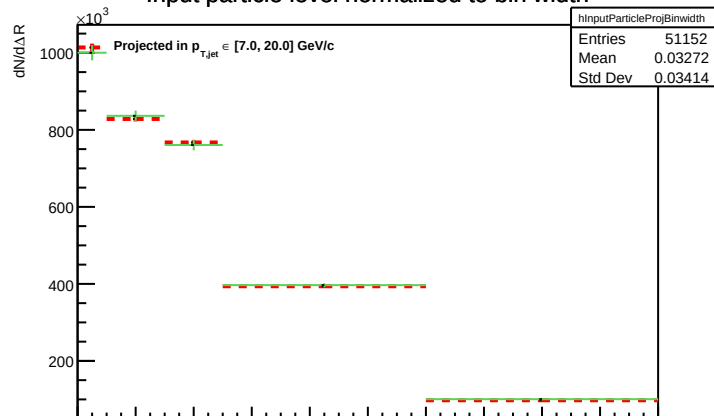

Unfolded 2D histogram with 8 iterations

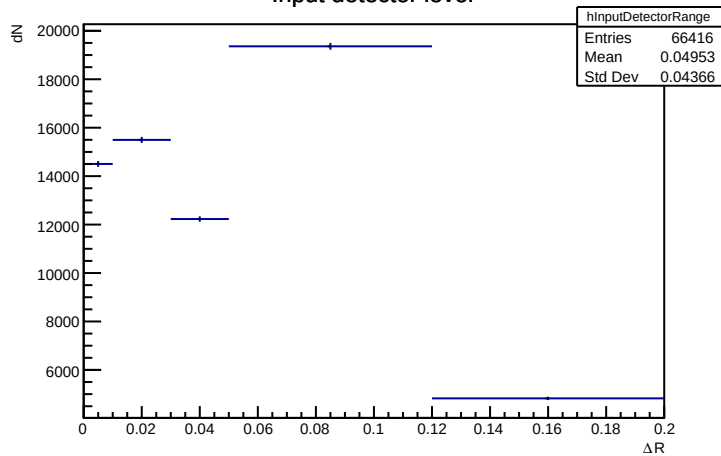

Not normalized input particle level vs fully corrected unfolded distribution

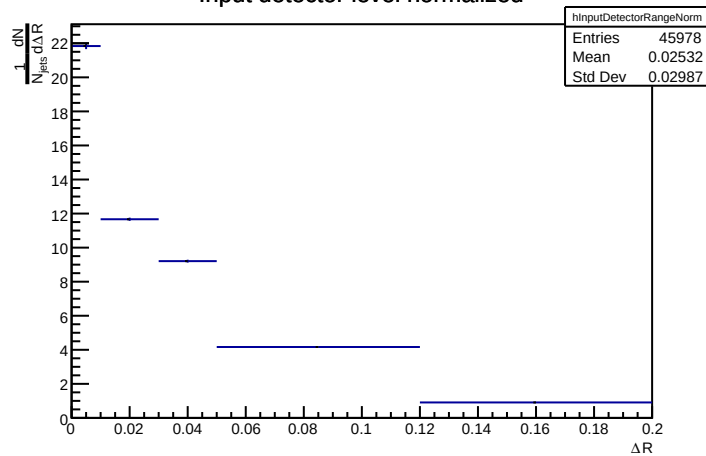

Input particle level normalized to bin width

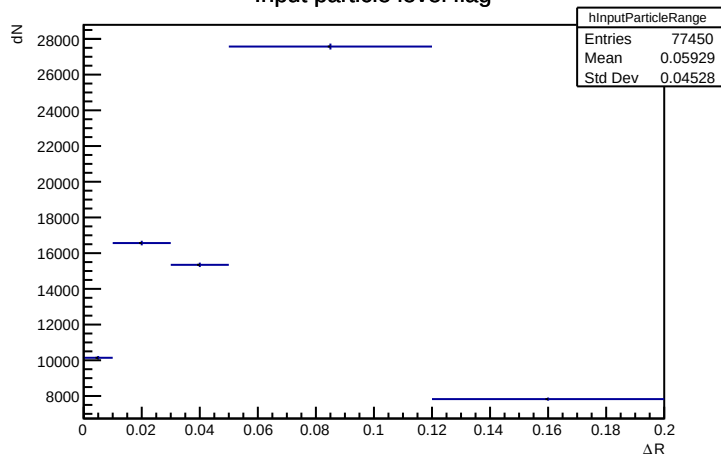

Input detector level

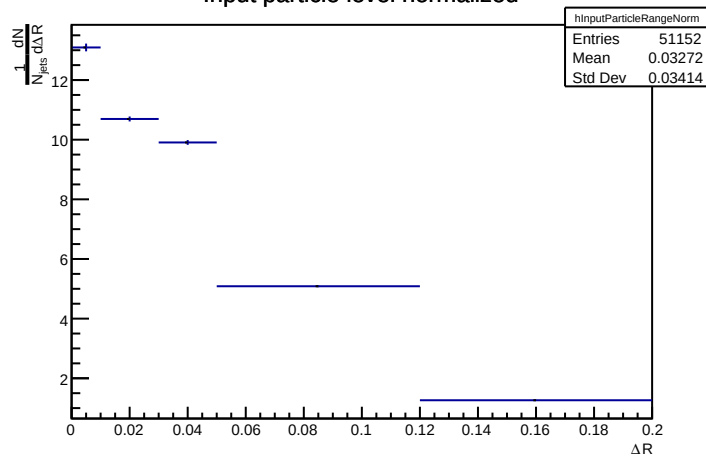

Input detector level normalized

Input particle level flag

Input particle level normalized

Ratio of input particle level to unfolded distribution, for each iteration
