

Run 2 style efficiency

Efficiency $\times$ Acceptance

Prompt D^0 's reponse matrix $p_{T, \text{ch. jet}}$ projection

Non-prompt D^0 's reponse matrix $p_{T, \text{ch. jet}}$ projection

Prompt D^0 's reponse matrix p_{T, D^0} projection

Non-prompt D^0 's reponse matrix p_{T, D^0} projection

$\epsilon_{\text{kinematic}}$ of particle level prompt D0s $\epsilon_{\text{kinematic}}$ of particle level non-prompt D0s $\epsilon_{\text{kinematic}}$ of detector level prompt D0s $\epsilon_{\text{kinematic}}$ of detector level non-prompt D0s

Prompt denominator before folding

Prompt denominator after folding

(run 2)/(run 3) denominators ratio both at particle level

Non-prompt denominator before folding

Non-prompt denominator after folding

(run 2)/(run 3) numerators ratio both at detector level

Prompt denominator from run 2 style efficiency

Prompt numerator from run 2 style efficiency

Prompt numerator from run 3 style efficiency

Run 3 style efficiency

Efficiency $\times$ Acceptance

Run 2 style prompt 3D efficiency xy projection

Run 2 style prompt 3D efficiency xz projection
